Dear guests, esteemed academics, and dear students,
We are very pleased to be presenting the third stage of the Student Exhibition, organized within the framework of the "POISON" International Artistic and Scientific Research Project, a collaborative initiative between Istanbul Yeni Yüzyıl University, Istanbul Beykent University, and Kherson National Technical University of Ukraine.
Led by Associate Professor Anna Poletayeva and Assistant Professor Pınar Ceylan, this project aims to bring together art and science, promoting the communication of scientific knowledge through creative and innovative approaches. The exhibition features 137 design and video works created by students from the three universities, while 25 researchers have actively contributed to the project.
I would like to express my sincere gratitude to all academics, researchers, students, and supporting institutions whose efforts made this meaningful collaboration possible. I hope this exhibition will be inspiring, productive, and enjoyable for all participants.
Thank you for your presence, and I wish you a pleasant exhibition experience.
